eBay Marketplace Account Deletion

eBay users have the right to request their personal data be deleted from eBay's systems, as well as deleted from the systems of all eBay partners who store/display their personal data

eBay Marketplace Account Deletion: Flow

Step 1

A user requests data deletion

An eBay marketplace users requests their data to be deleted

Step 2

eBay notifies developers

eBay sends a marketplace account deletion request to 3rd-party apps

Step 3

Developers acknowledge

A developer responds with acknowledgment of receipt

eBay Marketplace Account Deletion: Our Solution

3rd-party applications provide data deletion callback

POST request payloads contain user identifiers

3rd-party callbacks respond with the receipt confirmation

ebay

eBay Marketplace Account Deletion: Terms and Agreements

eBay's responsibility ends once 3rd-party applications confirm the receipt of the data deletion request

Failure to comply with the requirements may result in 3rd-party application being deactivated and developer account suspended

Shopping API: Authorization

OAuth 2.0 authorization

Enforcement is coming

Certificate Authority Change

eBay is switching the certificate authority (CA) used for public certs from DigiCert to Sectigo (previously Comodo)

Timelines: January 2022

Sectigo CA is already supported in sandbox
